Existing feature modification or enhancements:

➔ platform/ui/src/components/Header/Header.tsx
  ● Logo Updated:
       The OHIF logo was **replaced** with the new AIH logo.

```
<img
          src={aihLogo}
          alt="Logo"
          style={{
            width: '45px',
            height: '45px',
            borderRadius: '50%',
            marginLeft: '10px',
            marginRight: '5px',
            objectFit: 'contain',
          }}

 />
```

  ● Local storage is cleared when the components mount:

```
useEffect(()=>{
    localStorage.setItem('items', '');
    window.dispatchEvent(new Event('itemsData'));
}, []);
```

  ● Replaced `Icons.ByName` and `Icons.ChevronClosed` with `Icon`:

```
<Icon
     name="chevron-left"
     className="w-8 text-white"
/>
```

- Patient data anonymisation:

```diff
-  showPatientInfo = PatientInfoVisibility.VISIBLE_COLLAPSED,
+  showPatientInfo = PatientInfoVisibility.DISABLED,
```

→ platform/ui/tailwind.config.js
- Font size updates:

```diff
-       xxs: '0.625rem', // 10px
-       xs: '0.6875rem', // 11px
-       sm: '0.75rem', // 12px
-       base: '0.8125rem', // 13px
-       lg: '0.875rem', // 14px
-       xl: '1rem', // 16px
-       // 2xl and above will be updated in an upcoming version
+       xs: '0.65rem',
+       sm: '0.75rem',
+       base: '0.8125rem',
+       lg: '0.9275rem',
+       xl: '1.25rem',
```

- Colour Changed:
  From blue to green

New Features:

➔ Login Page :
platform/app/src/components/LoginSignup/LoginSignup.tsx

- Users can enter their email and password to log in.
- On successful login, authentication tokens are stored in the browser, and the user is redirected to the home page.
- Shows an error message if login credentials are invalid.

➔ **platform/ui/src/api/apiClient.js**
  - Delete Study:

```
+  async deleteStudy(studyUid) {

+    ////console.log('Deleting this study',
apiEndpoints.manage(studyUid));

+    return await this.makeRequest('DELETE',
apiEndpoints.manage(studyUid), undefined, {}, true);

+  }
```

  - Share Study:

```
+  async updateAccess(studyUid, email, role) {

+    ////console.log(studyUid);

+    const requestBody = {

+      email: email,

+      role: role,

+    };
```

```
+     ////console.log('sending share api',
apiEndpoints.updateAccess(studyUid));

+     const res = await this.makeRequest(

+       'POST',

+       apiEndpoints.updateAccess(studyUid),

+       requestBody,

+       {},

+       true

+     );

+     ////console.log('RESS', res);

+     return res;

+   }
```

- Labeling Studies:

```
+   async putGroundTruth(studyUid, groundTruthData) {
+     // //console.log('Updating ground truth for study:',
studyUid);
+     return await this.makeRequest(
+       'PUT',
+       apiEndpoints.groundTruth(studyUid),
+       groundTruthData,
+       {},
+       true
+     );
+   }
```

- Fetching study access list:

```
+  async getAccessList(studyUid) {
+    ////console.log('sending share list api',
apiEndpoints.getAccessList(studyUid));
+    return await this.makeRequest('GET',
apiEndpoints.getAccessList(studyUid), undefined, {}, true);
+  }
```

- Handle Models:

```
+  async handleModel(model, series = 'all', frames = 'all',
studyUid, setToastMessage) {
+    ...
+  }
```

```
+  async handleMammoModel(studyUid, setToastMessage) {
+    ...
}
```

```
+async handleGBCModel(studyUid, setToastMessage) {
+    ...
}
```

```
+  async handleXRayModel(studyUid, setToastMessage) {
...
}
```

➔ Side Panel:
  **platform/ui/src/components/SidePanelModified/SidePanelModifi
  ed.tsx**

  - Dropdown: Lets users switch between content for "Mammo," "GBC,"
    and "X-Ray."
  - Dynamically displays content based on the selected option.

➔ Bi-Rads Scoring Feature:
  **extension/measurement-tracking/src/panels/MammoPanel/Actio
  nButtons.tsx**

➔ GB-Rad Scoring Feature:
  `extensions/measurement-tracking/src/panels/GbcPanel`
  `/ActionButtons.tsx`
